

## Soft-Engine - Software Cons

### Main features

**CONS** is a **software** by Soft-Engine to develop templates for the parts for **exhaust pipes construction** (mainly for 2 stroke engines).

The software runs on Windows environment and it's very easy to use.

*Autocad exporting of conic shapes*

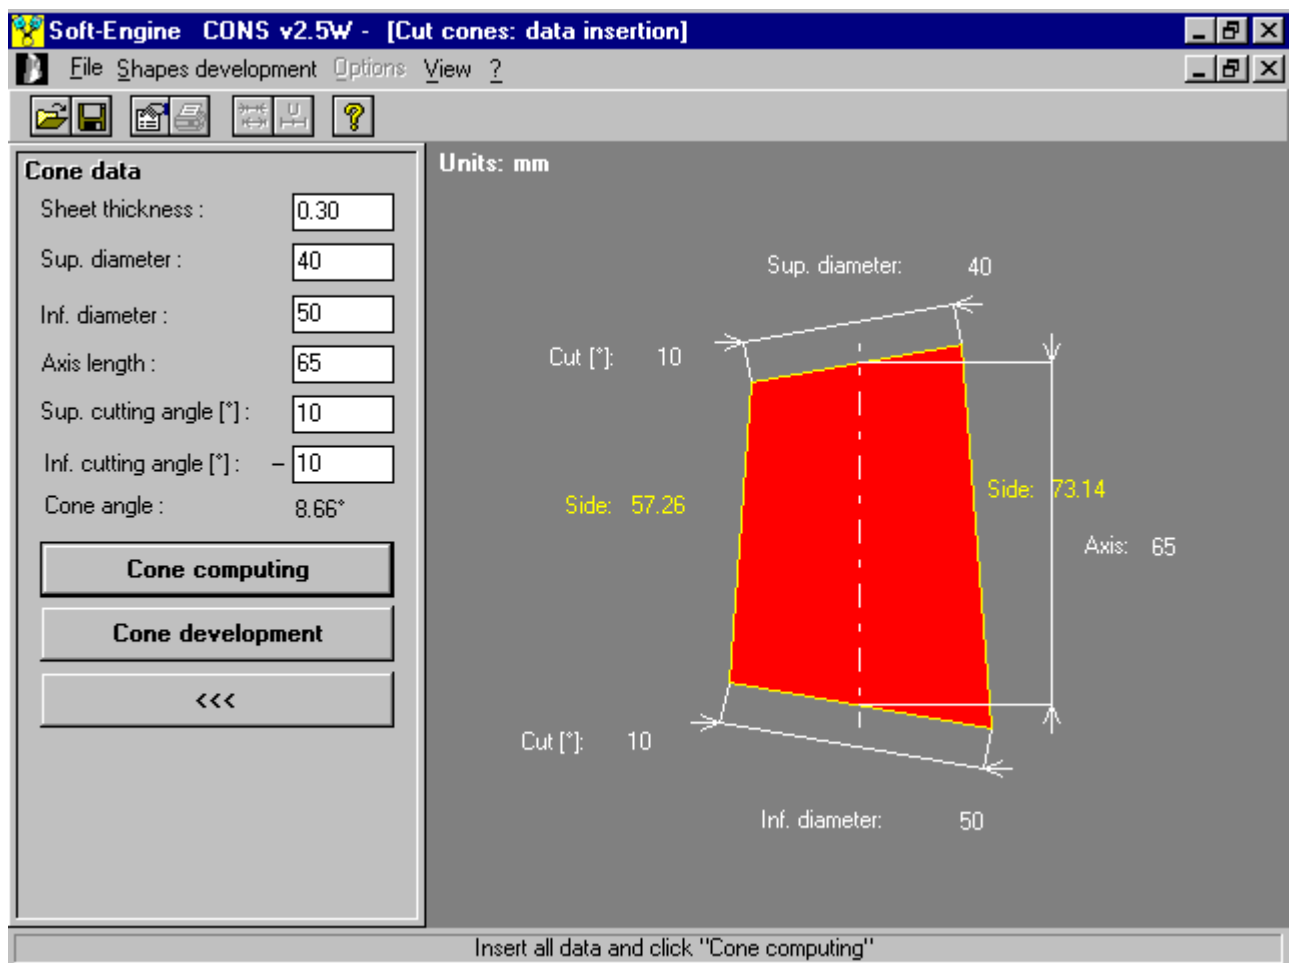

## Version 2.0 W

Here is a list of its most important utilities:

- Parallel and not parallel bases **cones** development
- Parallel and not parallel bases **cylinders** development
- Welding side choice
- Data files

Printing on a 1:1 scale with any kind of printer, print calibration, printer set-up, printing preview.

The dimensioned pictures of cylinders and cones redraw automatically when data change and dimensions are indicated on both sides.

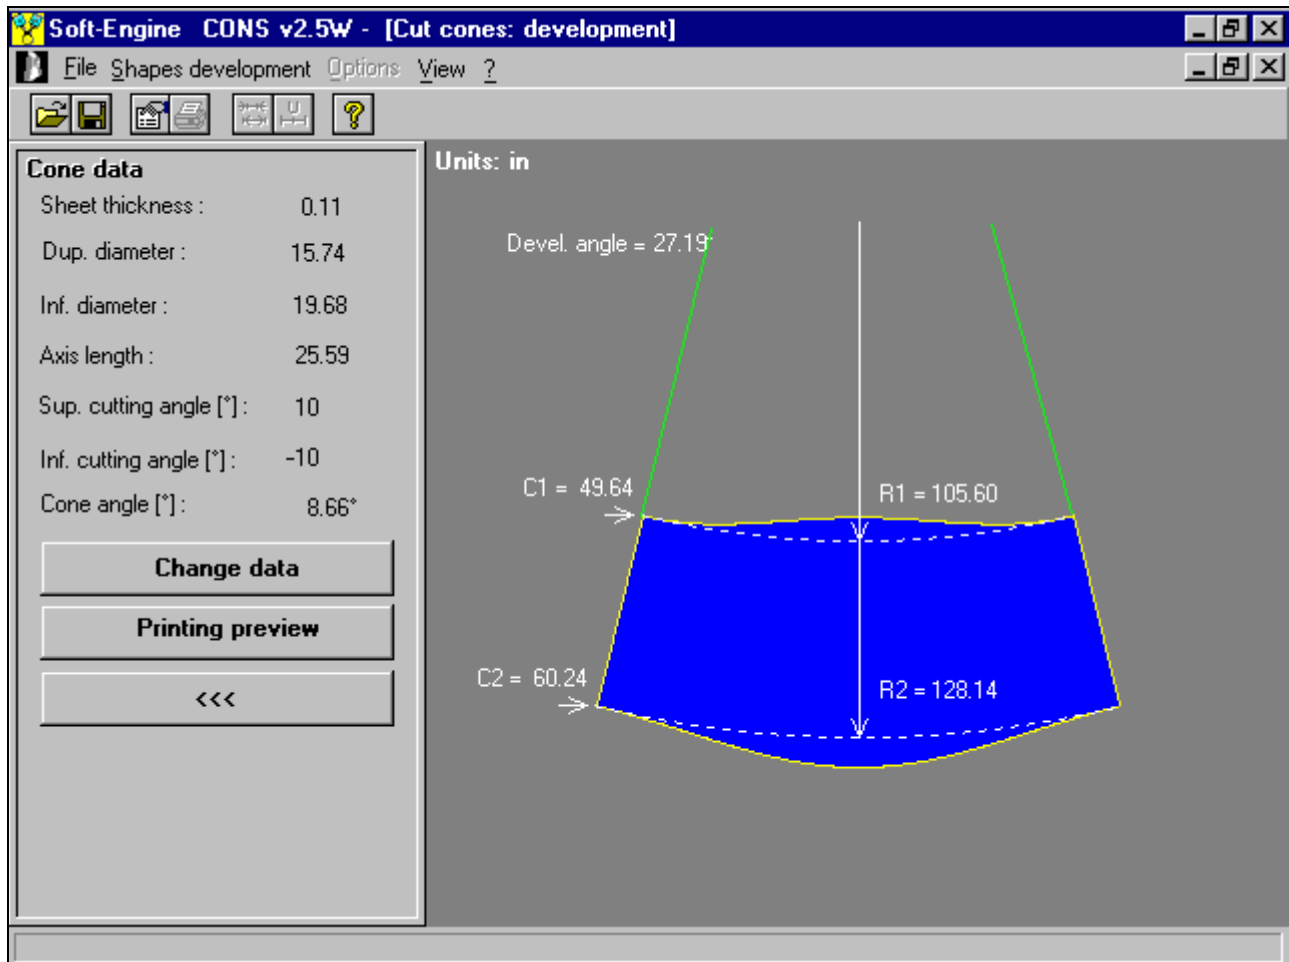

*Divergent cut cone data input*

## Version 2.5 W

The same as 2.0 W version including :

- 🔧 **conic curves** with three different options:
  - first and last sections included automatically
  - no first and last sections included
  - chosen about first and last sections included
- 🔧 **cylindrical curves**

*Divergent cut cone envelope*

### Version 3.0 W

The same as 2.5 W version including:

☞ **DXF Files** (for **CAD systems**)

☞ DXF data filing

☞ **ISO Files** (to drive machines tools for laser sheet cutting and die construction)

☞ ISO data filing

*Conic curve*

Version 4.0 W

In addition to the functions provided by the previous versions, the 4.0 version also allows the creation of the central body of the complete silencer, with each single part that can then be developed into a conical or a cylindrical shape, to obtain simply by clicking the part of the shape that you like to create. The software provides for the introduction of the diameters and lengths for each individual parts and calculates the inclination of the various cones. A real-time drawing of silencer central body facilitates the introduction of data. It is possible to print complete silencer shape and the various conical/cilindrical developments on any kind of support, with or without a data table and with or without the construction lines.

Silencer profile

## Soft-Engine engine simulation software – software “Cons”

### Versions and costs

Version	Cost
<b>Cons 2.0 W</b> Engineering, development and printing of conical parts for exhaust systems.	€ 220.00
<b>Cons 2.5 W</b> Like 2.0W version including conic and cylindric curve.	€ 410.00
<b>Cons 3.0 W</b> Like 2.5W but including DXF and ISO file exporting.	€ 980.00
<b>Cons 4.0 W</b> Like 3.0 W version but including the development and printouts of central body of total silencer, management of construction lines and any kind of printouts support.	€ 1,500.00

### PC mininum configuration

Feature	Description
Processor:	Any personal computer IBM compatible.
System:	Windows ME, NT, Xp, Vista, Seven, Eight, Ten - 32 or 64 bit systems.
Memory RAM and Hard Disk:	At least 512 MB RAM and 2 GB free in the hard disk (for best Windows performances).
CDrom or Dvdrom device:	Speed at least 52X.
Graphic card:	VGA, SVGA and compatible cards, set at least 32 bit, Min. resolution: 1024x768.
Miscellaneous:	Keyboard, mouse, at least 1 USB port free (to connect the printer).
Printer:	Any ink-jet printer. Total compatibility with laser printers.
Total compatibility with notebooks and cases minitower PC.
